

Aim: Design an html form for displaying information using interactive css including images, tables.

Theory:

HTML form will consist of following main HTML fields, which must necessarily be filled out before submitting the form. The field names such as first name, Last name, Email=Id, mobile number, Address, Hobbies, course, gender, Date of birth etc. are used in the registration form.

Start designing registration form using HTML (hypertext markup language) and CSS (cascading style sheets). We've also added two HTML buttons i.e submit and reset. The submit button will perform submitting action after clicking on it. Similarly if the user wants to clean all the fields data then the reset button will erase All the data then the clicking on it.

In this form we used the following HTML fields such as:

1. Textbook, textarea, Radio buttons, email, Date, Number, Tel, checkbox, Dropdown

```
button:hover {  
background-color: #0056b3;  
}  
/* Image styling */  
img {  
display: block;  
margin: 20px auto;  
width: 150px;  
border-radius: 50%;  
}  
/* Table styling */  
table {  
width: 80%;  
margin: 20px auto;  
border-collapse: collapse;  
}  
/* Table cell styling */  
th, td {  
border: 1px solid #ddd;  
padding: 10px;  
text-align: center;  
}  
/* Table header styling */  
th {  
background-color: #007bff;  
color: white;  
}  
</style>  
</head>  
<body>  
<!-- Header text --&gt;<br/><h2>Simple Information Form</h2>  
<!-- Form section for user input --&gt;<br/><form>  
<label for="name">Name:</label>  
<input type="text" id="name" placeholder="Your name">  
<label for="email">Email:</label>  
<input type="email" id="email" placeholder="Your email">  
<label for="message">Message:</label>  
<textarea id="message" rows="4" placeholder="Write something..."></textarea>  
<button type="submit">Send</button>  
</form>  
<!-- Placeholder image below form --&gt;<br/>  
<!-- Table to display sample data --&gt;<br/><table>  
<tr>
```

```
<th>ID</th>
<th>Name</th>
<th>Email</th>
</tr>
<tr>
<td>1</td>
<td>Sam Wilson</td>
<td>sam@example.com</td>
</tr>
<tr>
<td>2</td>
<td>Emma Brown</td>
<td>emma@example.com</td>
</tr>
</table>
<!-- Note: The lang="en" attribute in &lt;html&gt; is not strictly necessary, but it is recommended for
accessibility and SEO. --&gt;
&lt;/body&gt;
&lt;/html&gt;</pre>
```

Simple Information Form
